# LAB TESTS

## WHAT TO EXPECT

When will my results be available?

Typically lab tests will be done within 48-72 hours. Some special tests need to be sent to an outside lab and can take a few weeks.

---

Where can I see my results?

Test results are available on the My Doctor Online App and KP.org, typically within 48-72 hours.

Please note that each test result is released when it is complete. Typically you'll get your results at the same time your doctor does.

[Download the app](#)

---

What's next?

Once ALL test results are complete, someone from your doctor's office will reach out via phone call, letter, or message on My Doctor Online. Please allow 5-7 days before contacting your doctor if results that appear to be missing or if you have questions. Most doctors review results and add explanatory comments as soon as possible after receiving all results.
